

ATMC Cable Update

Effective January 1, 2020

2020 TV Rate Adjustments

The costs that ATMC must pay for local broadcast stations and cable TV networks will increase to start the new year. While ATMC has done its best to keep cable TV prices as low as possible, channel carriage requirements, increased programming fees, and overhead costs associated with providing cable TV service continue to make stabilizing costs difficult. As a result, ATMC must adjust its prices to cover these increased costs.

We encourage you to contact us to ensure that you have the best bundling option available for the lowest price. ATMC also now offers MergeTV, a new service which will allow you to stream your ATMC cable TV package over your ATMC internet service eliminating the costs of digital cable boxes. In addition, you can also visit www.atmc.com to check out our helpful guide on cord-cutting options that may help you identify a more cost-effective streaming alternative to cable TV.

Below is a chart detailing the 2020 prices for cable TV packages and equipment. These new prices will take effect on your next monthly billing statement. Thank you for your continued support of ATMC.

We appreciate your understanding of this matter.
